Akshey Verma

+91-9758109292 | http://vermaaakshey@gmail.com | LinkedIn | GitHub

Education

K.R. Mangalam University, Gurugram **2023 - 2027**

B.Tech in Computer Science & Engineering *7.4/10 CGPA*

Work Experience

CodeAlpha **June 2025 – July 2025**

Software Developer Intern *Remote*

Internship Completion Certificate

- *Developed backend features using **Node.js, Express.js, and MongoDB** following.*
- *Practiced version control and project hosting on **GitHub** while improving frontend development skills.*
- Enhanced **problem-solving** and coding efficiency through real-world project tasks.
- *Assisted in **debugging, testing**, and optimizing application features, improving code reliability and maintainability.*

Main Flow Services and Technologies

Software Developer Intern

- *Developed backend features using **Node.js, Express.js, and MongoDB** following.*
- *Practiced version control and project hosting on **GitHub** while improving frontend development skills.*
- Enhanced **problem-solving** and coding efficiency through real-world project tasks.
- *Assisted in **debugging, testing**, and optimizing application features, improving code reliability and maintainability*

Skills

Languages: JavaScript, TypeScript, Java, Flutter
Backend: Node.js, Express.js, RESTful APIs Development , Authentication, API Integration
Frontend: React.js, Next.Js, HTML, CSS, Bootstrap, Tailwind CSS
Databases: PostgreSQL, MongoDB
Tools/Platforms: Postman, VS Code, Figma
Operating systems: Windows, MacOS
Testing & Automation: Selenium WebDriver, Unit Testing (JUnit), API Testing (Postman)
DevOps & CI/CD: Jenkins, Git, GitHub, Continuous Integration / Continuous Deployment (CI/CD)

Projects

Job Vacancy Portal *(AI Chat Application)* | MERN Stack, OpenAI API

- Built **a full-stack AI chat** application using OpenAI APIs with real-time conversational responses.
- Developed secure backend routes for **chat handling, thread management, and API communication**.
- Implemented an **interactive UI** with chat window, typing effect, loaders, and persistent chat history using database

Social media application |

- **Developed a full-stack accommodation booking platform** with user **authentication**, property listing creation, and booking workflows.
- *Implemented user **authentication and authorization workflows**, ensuring secure access and data handling.*
- **Implemented map-based location search using Mapbox** and followed **MVC architecture** for scalable backend design.

Achievements

- *Solved 60+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks focusing on arrays, recursion, and graph algorithms.*
- *Built and deployed **multiple full-stack web applications** using **MERN stack**, gaining hands-on experience in **RESTful APIs, authentication, database integration, and deployment workflows.***
- *Gained practical exposure to **problem-solving, debugging, and code optimization**, applying **core computer science fundamentals** in real-world projects.*

Position of responsibility

- Independently handled **frontend and backend development tasks** across multiple projects, ensuring timely delivery and code quality.
